

ICS

INTEGRATED

COCKPIT

SYSTEM

This BMC innovation made its debut on the Roadmachine 01 in 2016 and is now standard on nearly all BMC bikes.

ICS offers:

- Smooth, hidden cable routing from handlebar to frame for a clean look and strong build.
- A refined stem-to-frame interface that enhances aerodynamics, aesthetics and mechanical integrity.
- Easy fit adjustments: spacers in 3 mm and 10 mm heights let you fine-tune stack without disconnecting hoses.
- Compatibility with both hydraulic brake hoses and shift hoses inside the cockpit area, plus the option to use ICS on bikes with external routing thanks to the standard 1" 1/8 steerer.

ICS delivers integrated style and performance, making the cockpit cleaner, stronger and more adjustable.

Identifying Frame and Cockpit compatibility

ICS requires a fit between 3 elements: [1] Frame, [2] Cockpit or Stem, and [3] Top cones and spacers.

When you START WITH A BIKE

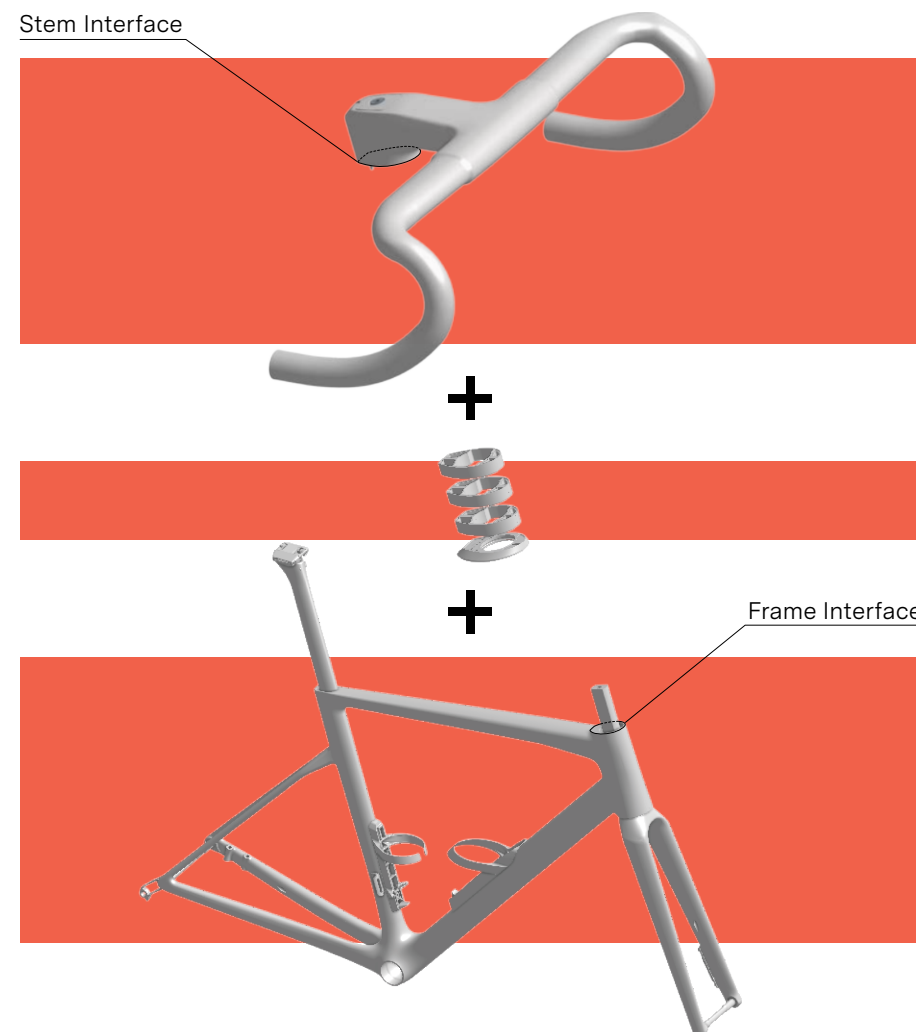

Check [1] **Frame Interface**.

In [2] **Stem Interface**,
find a cockpit or stem with the same interface.

Pick matching Top Cone and Spacers suggested by [2] **Stem Interface**.

When you START WITH A COCKPIT OR STEM

Check [2] **Stem Interface**.

In [1] **Frame Interface**,
find a frame with the same interface.

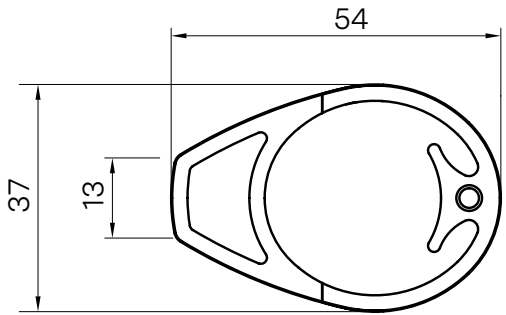

Pick matching Top Cone and Spacers suggested by [2] **Stem Interface**.

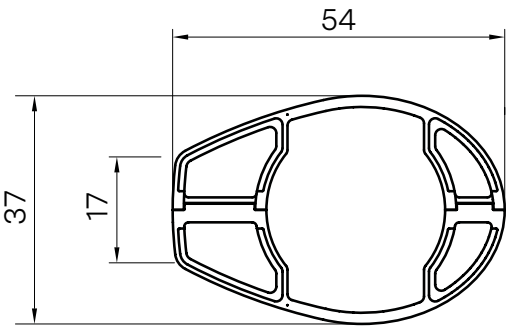

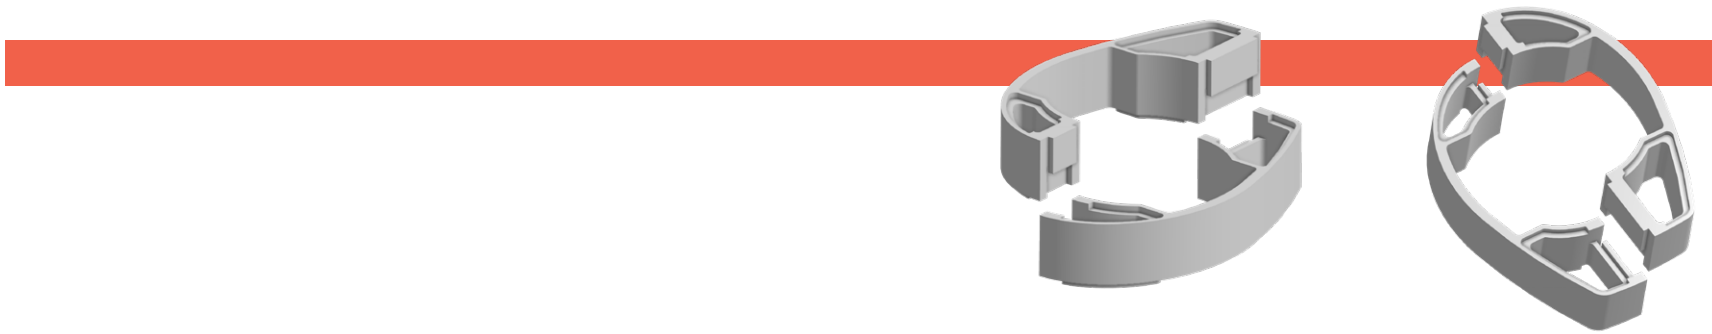

Identifying ICS Spacers Design generation

ICS has evolved in time. ICS2 is now featuring more complex top cones and spacer shapes to provide an even stronger and more aesthetic final assembly.
